THE BIBLE SPEAKS

Collegiate Edition
 Sunday School Lessons

BY DR. KENNETH J. FOREMAN

Bible Material: 11 Samuel 7: 11 through 12: 1 Kings 1: 1-17.
 Devotional Reading: Psalm 131: 1-17.

Facing My Sin

Lesson for May 10, 1959

LAST WEEK something was said about David learning a hard lesson the hard way; namely that not even a king, an absolute monarch, is so highly placed that the law of God no longer concerns him. David lived in a time when in most kingdoms the king's will was law. Given if what he did was wrong for most people, if he did it he couldn't be wrong, for he was king. The brave prophet Nathan brought David to his senses; he made him face his own sin. The Dr. Foreman whole story is there in 11 Samuel, and has often been told. We can learn much from it; for it shows one way in which we can do what we all hate to do and some people never can do: face our own sins and admit that they are sins and that we committed them.

To Know

"You can't carve rotten wood," says an old Chinese proverb. And no prophet or preacher is going to get far making any one face his sins if the person involved has no notion of any difference between right and wrong. A conscience can be educated; but who can educate what isn't there? Now David had a conscience; that is, he knew that some things are right and some are wrong. When Nathan told him that made-up story about the rich man and the poor man and the lamb, David was hot. The rich man was wrong, David saw; very wrong, wrong enough to be executed on the spot. If David had reacted calmly to Nathan's story—if his response had been something like, "Well, that's a rich man for you," or "After all, that poor man was relieved of an expensive luxury," Nathan would have got nowhere with him. The first thing I need in order to face my sin, when that time comes, is to know, down in my bones, that sin is real, that some things are right and others are wrong. If I think "right" and "wrong" are just emotional words, meaning no more than "I like it" and "I don't like it," then I shall never face my own sin. I shall never even know what is eating away my soul.

To Imagine

Another thing is needed before I can face my sin. I must be able to imagine what it is like to be sinned-against. When David got so angry about that story Nathan told him, he wasn't angry about what happened to the rich man, though that would be a tragedy too. He was angry about the incident, because in his mind's eye he could see exactly how the poor man felt. (Was this because David's own father had been a sheep-herder?) Now no one up to that time had ever stolen a wife from David. He had done some wife-stealing even before the time of Bathsheba, but he had never seen the wrong in it. Wife-stealing was a recognized privilege of kings in those days.

By a brilliant, inspired single thrust when David's guard was down, that prophet made David see as it were in one flash what he had done to Uriah and to Bathsheba.

To Confess

There is a step beyond seeing that I have sinned. This is admitting that I see it. But there are two ways of admitting one's sin, whatever it may be. One is the "so what?" approach. "Yes, I did it, but it isn't very bad. . . . Yes, I admit it, but I couldn't help it. . . . I did it, but am I so much worse than a hundred other people? . . . Yes, I did it, but why not forget the whole thing, shall we?" This is not facing my sin at all. It is only admitting an act without seeing what a sin it is. The other way of admitting sin is to feel a deep sense of shame before God and man too. It is to stop excusing and defending myself, it is to take sides (so to speak) with the prosecution, it is to see myself no longer fit to be a companion for God or men. If what I can feel about my sin can be expressed in the language of the 1st Psalm, then there can be some hope for me. If I do not somehow share God's feeling about it, then I shall go on down and down. It is only when I see the pit into which I am falling, and see that it is a bottomless pit, that I am ready to be rescued.

My Neighbors

"My husband has to be different—he gets electroshocked in open spaces!"

SEEK YE FIRST THE KINGDOM

Yes-sir-ee, the world voted her a day and Heaven was glad. Right now you should wrap up your heart in a card or a package and deliver it at once. *She gave you life and love . . . what have you given her?* Mother is our warm meal when we are hungry, our extra blanket when cold, our light in a dark room . . . it takes Mother every time.

There is something very special, something extra that comes only from mother . . . she makes us tick. Life will not change Mother's love, death will not conquer it. *She is the soaring cloud of radiant rapture that lifts us to new attempts and the strength we need to see us through.* This is Mother's Day, may we be with her in Church.

BUY-NOTES on FOOD

BY MRS. LETTIE W. JASPER

From Extension Service, Kentucky College of Agriculture and Home Economics

Edible fats and oils are available in heavy supply to consumers. And the prospects are that they will reach a new peak of consumption, (about 45 pounds per person), this year. As a result, retail prices will average lower than a year ago.

The major increases are seen in lard and cottonseed oil. However, corn and soybean oil will certainly show no shortage. Cooking uses of fats and oils make baked products, such as pastries, cakes, and biscuits, tender and flakey, serves as a frying medium for meats, fish, doughnuts, and various vegetables; affects the texture and nutritive value of foods in which they are used, and acts as a carrier of flavor to enhance the flavor of foods. Oils used for salad dressings, mayonnaise, and dressings are, of course, used without cooking or heating, and are often selected for flavor and ability to carry flavors well.

A great many of the shortages found on today's retail market are hydrogenated. This means that hydrogen gas has been forced into heated liquid oils under pressure, thus forming a solid fat.

Both hydrogenated all-vegetable

table shortening and blended vegetable and animal shortenings are offered at the retail level. Vegetable shortenings are made up, primarily, of cottonseed and soybean oils with varying amounts of corn and/or peanut oils. Blended shortenings have differing amounts of animal and vegetable oils. Whichever is the greater in amount is listed first on a label. These shortenings are well adapted to deep fat and pan frying, pastry, and batters.

Oleomargarine is made from a mixture of skim milk and/or animal and vegetable fats. Used in cooking, for batters, and as a spread. Salad oil is usually a refined oil from cottonseed, corn, soybean, olive, or apricot. Suited for salad dressings, mayonnaise, and deep fat frying, (with the exception of olive oil, because of its low smoking temperature).

Butter is strictly a dairy product and because of its special flavor and color, is used in making pastry and fine baked products. Hydrogenated fats are stable at room temperature, whereas moisture and air may cause rancidity among others.

Some oils may solidify in the refrigerator. However, quality is not affected. All fats and oils will absorb odors and flavors in some instances if exposed to them.

PRODUCTION RECORD
The Holstein-Friesian Association of America, Brattleboro, Vt., has announced the completion of an official production record for a registered Holstein cow owned by Houchin Brothers, Valley Station, Va. This is Houchin Segi Ormsby, 3726458, producing 16,739 pounds of milk and 694 pounds of butterfat in 339 days on twice milking as a 6-year-old.

County Home News
By Mrs. Ida Carriethers

At the home we were all glad to have Mr. and Mrs. Bruce of the Bruce Nursing Home, Jeffersontown, visit us one day last week. It was nice having them and we hope they will visit us again some time.

Miss Angela First, Mr. Charles First, Jr., and Mr. Florence Bauer visited the home Sunday. Recent guests of Mrs. Ida Carriethers were Mrs. L. Hickman, Mrs. Maude Irvin, Mrs. Pauline Fox and Mrs. Jackulin Irvin Bixby, Fern Creek, and Miss Jewel Thurman, Mrs. Joyce Standiford and two children, Sharon and David, Louisville.

Mrs. Murray, Anchorage, visited the home again Friday. She brought flowers and candy for the women residents.

A.S.C. Lists Reminders For Tobacco Growers

By M. C. Brooks, chairman of the County A.S.C. Committee

Farmers in Jefferson County who are considering leaving strips of idle or fallow land in an alternate row arrangement with tobacco row are reminded by M. C. Brooks, chairman of the County A.S.C. Committee that the strips of idle or fallow land must be as wide as, or wider than four normal rows of tobacco acreage.

A "normal row" is described by Brooks, as being at least 36 inches wide or the actual distance between the rows of tobacco on the farm whichever is wider. Brooks said that anyone planning to leave idle or fallow strips of ground in the tobacco field should contact the county A.S.C. office before setting tobacco.

Home Gardens Mean Money

By H. C. BROWN, County Agricultural Agent

VALUE OF HOME GARDENS IN HIGH MONEY, NUTRITION. Home gardens can contribute to family income by reducing food costs. Estimate of value, depending on size and range from between \$150 and \$250.

Vegetables from home gardens are rich in vitamins and minerals. Garden products are a healthy hobby, providing a variety of vegetables all season and, generally, the produce of home garden is of higher quality than store-bought.

Size is an item on garden planning, generally 1,000 to 2,000 square feet will give vegetables all year for one person. Home gardens are well adapted to growing cabbage, peas, tomatoes, snap beans, watermelons, summer squash and sweet potatoes. Broccoli, eggplant, okra, acorn and butternut squash, Chinese cabbage and kale also can be tried. Good seed from a reliable source is a must.

Here's how to plan the garden: Take the best soil, be sure it is top soil, well-drained (not wet) and of good quality. Seeds will usually grow good vegetables. Avoid spots that are shaded, or have poor drainage, or are near a large sewer or pipe. Prepare the land several inches deep so that seed have a good place to grow.

Put on fertilizer at the rate of 1,000 pounds of 3-10-10 analysis per acre. If the soil is heavy, broadcast the other half and use it in Figure the amount of fertilizer needed on the basis of 14,500 pounds per acre and measure your home garden and see what part of an acre you have planted.

Grow the tall crops where they will not shade the others; and plant at least one row of sweet corn for proper pollination. Keep earlier and later crops together for "successive" plantings and group vegetables of similar families — such as lima beans and snap beans, or cabbage and broccoli — together for close control. When leafy vegetables are well along, side dress them with an ammoniac nitrate. Use about a quarter-pound of nitrate per 100 square feet.

Planting dates: Up to May 10 for tomatoes, beans, corn, cucumbers. From May 1 on, okra, sweet potatoes, watermelons.

Peas, onions, peas, cabbage, kale, broccoli and carrots should have been planted before now, actually about March 15-April 1. HARMONE DUSTS ARE USEFUL IN PLASTIC GREENHOUSES. Hormone dusts, used in tomato production in plastic greenhouses, have some advantage over sprays. They are easier to make up, require higher yields than did the sprays in tests last year at Lexington, and are easier to apply inside greenhouses.

First dust treatments should be just as strong as later treatments given when the plants are older and bearing three or four clusters of fruits.

Dusts were not as effective in the field as sprays, but did cause some worthwhile leaf injury. If dusts are to be applied in the field, do it on a quiet, clear evening.

Farm Facts FOR KENTUCKY FOLKS

by Wm. C. Johnstone
AGRICULTURAL REPRESENTATIVE
KENTUCKY BANKERS ASSOCIATION

GREEN COUNTY GETS GREENER. Nowhere in Kentucky is agricultural progress more evident than in Green County. Twenty-five years ago when I first worked there as extension agronomist, I was distressed to see so many acres of hill land, plowed, planted to corn, and then left exposed to the ravages of erosion through the entire winter. At that time the 30 thousand acres of corn usually produced about 650 thousand bushels — just about 20 bushels per acre. In 1958 only 15 thousand acres were planted to corn, but 775 thousand bushels of grain were harvested — over twice the former acre yield.

The big reduction in corn acreage was just the beginning of the changes that were to take place. The hill land taken out of corn was converted to pastures and many thousands additional acres of hill land were land, limed and fertilized and seeded to improve pasture mixtures.

Many more hill farms were managed more and better herds of beef and dairy cattle and these enterprises brought in new money. Dairy products are now a very important source of income. Green County was one of the first in the state to launch commercial broiler and egg production and now over 100 farms are getting supplemental income from poultry.

County Agent John Ewing is one of the excellent leaders of the county. It was he who sparked the movement 20 years ago to "Make Green County Greener." There are now many cause and effect in the county and hundreds of good farmers. Co-operation is the ingredient that has made Green County get greener.

Regulations Cited In Tobacco Acreage

By M. C. Brooks, chairman of the County A.S.C. Committee

Burley tobacco farmers in Jefferson County who grow what they believe to be "Maryland" tobacco in 1959 may not be eligible for price support on their burley tobacco, according to M. C. Brooks, chairman of the Jefferson County A.S.C. Committee. The use of the "Maryland" tobacco will be measured and combined with the burley tobacco acreage under the county committee determines on the basis of seeding, cultivation, curing and marketing practices commonly known to the area that the tobacco is not burley.

If the combination results in the burley tobacco allotment being exceeded, the farmer will be issued an excess burley marketing card and will not be eligible to obtain any price support. Also, marketing quota penalties will be collected on all the tobacco marketed from the farm and identified by such excess card.

To be eligible for a refund of the penalties caused by the "Maryland" tobacco, the farmer would be required to furnish satisfactory proof to the A.S.C. county committee that the "Maryland" tobacco was actually marketed as Maryland tobacco.

Mr. Thomas Yann, Richland Drive, and Mrs. Hugh Standiford spent the week-end in Eastern Kentucky.

The new building of the Buechel Church of Christ is under construction on Buechel Bank Road. It will be a beautiful structure. The plan is of Gothic design, of concrete blocks covered with brick. The old building on Bardstown Road was sold several months ago.

Mr. Everett Mills, who returned to his home on Waterson Trail from the Kentucky Baptist Hospital two weeks ago, is getting along well, we are glad to report.

Miss E. M. Moody is ill of pneumonia in a hospital at New Castle, Ind. She was on her way to visit her daughter, Mrs. Jack Blanton, when she became ill. We all hope and pray that she may regain her strength and soon be well.

Mr. and Mrs. Allen Taylor left Friday for Florida for a three-week vacation.

Mr. C. W. Hogue, of Bowling Green, will visit relatives here for several days next week. They are coming for a business trip to Louisville.

Miss Jacqueline L. Morris spent several days last week in Nashville, Tenn.

BOND SALES
Sales of Series E and H Savings Bonds in Jefferson County during March amounted to \$1,808,760. The county's 1959 goal is \$20,285,350 and the cumulative sales for the first three months total \$4,803,505 or 23.7 per cent.

Farm Bureau In Action

by CH.F. Fields
Kentucky Farm Bureau Fed.

FARM BUREAU IN WASHINGTON BEARS CURBS ON SPENDING

Farm Bureau legislative workers in Washington Report encouraging signs that the public is bringing increased pressure on the politicians to put the brakes on spending and to hold the line on federal taxes.

Farm Bureau members and leaders throughout the country have been busy writing their senators and congressmen, asking that the federal budget be balanced for the next fiscal year, and that federal spending be brought under control. Farm people are telling the politicians in plain language to vote against tax increases, and cut spending to bring the budget into balance.

Farmers are in a better position than practically any other group in the country to know what inflation and the constant rise in prices can do to their real income. Officials of the U.S. Department of Agriculture have predicted that net farm income will be about a billion dollars less this year than last. Most of this loss in income will be due to increased costs of production brought on by wage and price increases.

As consumers of more than 64 million tons of finished steel each year, farmers are particularly concerned about the current negotiations between the steel industry and the steel workers' union. If another unwarranted

FARM BUREAU IN WASHINGTON BEARS CURBS ON SPENDING

Farm Bureau legislative workers in Washington Report encouraging signs that the public is bringing increased pressure on the politicians to put the brakes on spending and to hold the line on federal taxes.

Farm Bureau members and leaders throughout the country have been busy writing their senators and congressmen, asking that the federal budget be balanced for the next fiscal year, and that federal spending be brought under control. Farm people are telling the politicians in plain language to vote against tax increases, and cut spending to bring the budget into balance.

Farmers are in a better position than practically any other group in the country to know what inflation and the constant rise in prices can do to their real income. Officials of the U.S. Department of Agriculture have predicted that net farm income will be about a billion dollars less this year than last. Most of this loss in income will be due to increased costs of production brought on by wage and price increases.

As consumers of more than 64 million tons of finished steel each year, farmers are particularly concerned about the current negotiations between

WITH THE P.T.A.'s AUDUBON

The John J. Audubon P.T.A. is holding a family night dinner and booths Saturday, May 9, from 4:30 to 7:30 p.m. The booths will include baked goods, linens, gifts and gadgets and a fish pond for the children. Proceeds from the dinner and the booths will benefit the school library. The public is invited.

At the last P.T.A. meeting the following officers were elected to serve for the next two years: Mrs. Garnett Wright, second vice president, and Mrs. H. L. Smith, secretary.

Mrs. Smith attended the life membership dinner at the annual convention of the Kentucky Congress of Parents and Teachers in Evansville, Ind. — Mrs. Charles E. Rosenauer, publicity chairman.

MT. WASHINGTON

The monthly meeting is scheduled for 7:30 p.m. Thursday, May 7, in the school gym.

Members of the 4-H Club will present the program they staged in the 4-H talent show at Roby School and will take part in display some of the things they made during the year.

The school is fortunate this year to have eight seniors who plan to go on to higher education. They are to be recognized and tell what they plan to do.

Sincere thanks go to all who were in the play, "Gay Nineties," loaned clothing or took part in any way that led to making the play a success. Mrs. Troutman, of the P.T.A. ways and means committee, reported that \$264.75 was cleared. — Anna J. Hall, publicity chairman.

Operation Of Children Training Group Aired

Two social workers at Central State Hospital outlined the Children's Training group in a panel discussion at a recent meeting of the Middletown Mothers' Club.

Mrs. Hazel Alcorn and Don Thacker described the "24-hour program for emotionally disturbed children as being 'as near like a home situation as possible.'"

The training group was begun in 1955, and through June, 1958, a total of 115 children went through the unit; 95 were sent home as cured, and only two had to return. The average stay is four months, Mrs. Alcorn said.

The unit has a capacity of 21 boys and six girls, ranging in age from six to 16. All receive individual school instruction from an accredited teacher. The children "live in" and are attended by 16 psychiatric aides, especially trained for the work.

HOMEMAKER CLUBS

FERN CREEK

The Fairmont Homemakers met Tuesday, April 21, at the Nicholson Hotel. Eleven members present and one former member were present.

Mrs. Morris demonstrated the proper way to make corsages and Mrs. Keller gave the lesson on the decorative pillows.

Mrs. Waggoner gave a reading on the crimson in the purple. — C. J. Keller, publicity chairman.

NORWOOD

Mrs. M. Roberts, 202 Fairmeade Road, will be hostess at the 10 a.m. Tuesday, May 12, meeting of the Norwood Homemakers Club. Mrs. Edward L. Mercker, club publicity chairman, said Tuesday. Mrs. Claude Mounsey will be co-hostess.

County Softball Play Opens Season May 13

All playgrounds that have organized softball leagues scheduled will open their playground season under the Jefferson County Parks and Recreation Board plan May 13. The local recreation committee will provide the lights on from that time on. The paid supervisors of the county recreation board will be on duty from 6 until 10 each night there is league play.

It was also announced that there is still one opening in a fast pitch league at Fern Creek Thursday nights. Anyone wishing to enter or interested may call the County Recreation office at JUniper 3-2618 and ask for Charlie Spears or James McLain.

K.F.W.C. To Hold 64th Meeting In Louisville

The executive committee of the Kentucky Federation of Women's Clubs has issued the official call for the 64th annual convention to be held May 12, 13 and 14 at the Brown Hotel. Registration will begin at noon, Tuesday, May 12, on the lobby, Bluegrass Foyer, "Kindle a Light of Wisdom — It Will Illuminate Others," has been selected as the theme for the 1958 convention. Following the district governor and state chairman's luncheons at 12 Tuesday, the board of directors will meet in the Rose Garden at 2 p.m. This meeting is open to the entire assembly.

Funeral Held Tuesday For Spencer Native

Funeral services for Mrs. Josephine Snider, 55, who died at 2:30 p.m. Saturday in her home in Spencer County near Wilcoxville, were held at 11 a.m. Tuesday in Myers Funeral Home, Jeffersontown. Interment was in Resthaven Memorial Park.

Mrs. Snider, a native of Spencer County and a member of Little Mount Baptist Church, leaves a daughter, Mrs. Dorothy Hayden, Jeffersontown; two sons, Joe and Herbert Snider, Wilcoxville; 11 grandchildren and 17 great-grandchildren.

TRUTH DETECTS ERROR

CHURCH PEOPLE BEWARE

The best reason in this world why you should study the Bible prophecy with me is that I understand Daniel and Revelation, (Rev. 12:10), and because Jesus commands you to understand Daniel at this certain time, (Matt. 24:15, Dan. 12:4-10). Church people who understand Daniel and Revelation and take heed to it shall be purified, made white and tried by the wicked church and people who do not understand Daniel, (Dan. 12:10, Rev. 12:3, Matt. 24:45-51).

The 18th chapter of 1 Kings shall be repeated in this our day. Elijah, the prophet of God, prayed for fire to come down to prove who was the servant of God, and the 400 prophets of Baal were put to earth. But in Revelation 13:11-17, the 400 false prophets shall be given power to call fire to come down upon this planet, and the true prophets of God shall be put to death. Satan shall impersonate Christ; he shall appear and shall heal the sick and do many miracles, (Matt. 24:23-26). He shall claim that he has come to set up the kingdom of God on earth, and he shall lead all nations to deliver up, and afflict, and kill, and hate all the faithful and wise servants of God, (Matt. 24:9-10).

The Holy Spirit shall be poured out upon all the faithful and wise church people in all church denominations, (James 5:7, Rev. 18:4), and they shall be given power to heal the sick, and they shall be united in answer to the prayer of Jesus Christ (John 17). The place to begin to understand Daniel and Revelation is Daniel 2. The false teachers of Daniel 2 shall rise up like buzzards and eat flesh and drink my blood, and spew it all over the population when they read this one, or they shall repent, for an honest man will admit he is wrong when he realizes it, (Matt. 7:16-23).
